Our Mission:

TPAN empowers people living with HIV through peer-led programming, support services, information dissemination, and advocacy. We also provide services to the broader community to increase HIV knowledge and sensitivity, and to reduce the risk of infection.

Proud Publishers of

*"Committed to Living -
Committed to You"*

Dear Students

Happy New Year

TPAN empowers people living with HIV through peer-led programming, support services, information dissemination, and advocacy. We also provide services to the broader community to increase HIV knowledge and sensitivity, and to reduce the risk of infection. Having said this, we would like to introduce Harold Washington College (HWC) to a program that we believe, would be beneficial for the student population at HWC. The program we will be offering to HWC will assist in helping high-risk individuals manage high risk sexual behaviors, substance use, and mental health issues. The POWER program, which is Positive Outcomes for Wellness Education and Recovery, is a harm reduction intervention for men who have sex with men, other at-risk males, as well as the greater student body of HWC who are at greater possibility for higher risk sexual activities, HIV infection and substance abuse.

We would love the opportunity to meet with you. On Wednesday January 19, 2011 from 3:30-5:30 PM we will be holding an open house in room ____ (TBA). When we meet, we will present you with further information regarding our program, answer any questions that you might have, regarding the Six-week POWER program which will be offered at HWC on Mondays, beginning Monday January 24, 2011. For further information you may stop by and speak with anyone in the Wellness Center or feel free to call and speak with any of the POWER staff listed below. Once again, we look forward to meeting with you!

Sincerely,
Daniel R Sullivan
