

# GET TO KNOW US.

# TPAN

TPAN saves and empowers  
lives affected by HIV and health  
disparities in Chicago. **Join us.**

[tpan.com](http://tpan.com)

TPAN's care and services span a broad range of health needs and address every chapter of life for thousands of people. Here are a few highlights of our work:

**We provide 2,000 Chicagoans** with quality health care and compassionate support every year. Nearly 1,000 people will know their HIV status this year because of TPAN's outreach and testing in communities across our city.

**More than 150 LGBTQ youth** turn to us each year to find healthier ways of living. TPAN provides a safe space and essential services to homeless or unstably housed young people.

**We are a gateway to care** for hundreds of older adults; one of every two clients of TPAN's case management services is an older person living with HIV.

**We deliver a lifeline** of health news, treatment information, and compelling stories to more than 100,000 readers of every issue of our nationally distributed magazine, POSITIVELY AWARE.

## Three of TPAN's newest programs

### HOPE

Through HOPE (Healthy Outcomes through Prevention & Education), TPAN engages young adults in innovative ways that connect them to care, peer support, and healthier living. HOPE addresses young people's most important needs—from mental health issues to navigating HIV care—and moves them toward profound life changes. With HOPE, we reach vulnerable young people, including gay and bisexual African American men and straight African American women in Chicago.

delivers unique care in our home city and extends TPAN's HIV-focused expertise and experiences to peers in cities across the country as well as to 100,000+ POSITIVELY AWARE readers nationwide.

### PAWS N' EFFECT

TPAN's unique partnership with Felines & Canines and Fred Says promises to innovate how we address mental health and treatment concerns for people living with HIV. TPAN pairs loving rescue dogs in need of homes with clients struggling with the challenges of isolation, depression, and HIV treatment. Through the simple yet profound connection between our clients and carefully placed dogs, TPAN aims to dramatically impact the ways our clients feel, function, and engage in their care.

### POSITIVELY AGING

TPAN joins with The Reunion Project, a national coalition of long-term survivors of HIV, to address the needs of older adults (50+) living with HIV. This is Chicago's first health care and support program specifically tailored to older adults that

YOU GOT THIS  
...AND WE GOT YOU.  
**HOPE**  
HEALTHY OUTCOMES THROUGH PREVENTION & EDUCATION

**POSITIVELY AGING**

YOU HAVE THE HOME I NEED,  
I HAVE THE LOVE TO GIVE.  
**PAWS N' EFFECT**

A citywide dining experience and fundraising event that helps provide health care and support to more than 2,000 Chicagoans each year who are living with or affected by HIV.

[tpan.com/diningout](http://tpan.com/diningout)

A one-of-a-kind cycling and fundraising experience that spans three states, 200 miles, and engages thousands of supporters, volunteers, and advocates to deliver care in Chicago.
